MT. CAESAR UNION LIBRARY

Librarian's Report

For the first time a summer reading program was started for the children in grades 1 through 6 and was very successful. Seventy-eight youngsters were enrolled and read a total of 605 books. Each child received a registration card and a folder in which were recorded the titles of the books read. At the special movie program held in September, an achievement certificate was awarded to each one.

The library started its Monday hours on November 27, 1967 and is staffed by the librarian in the afternoon and a volunteer trustee or the assistant librarian in the evening. The library is now open 13½ hours each week: Monday, Tuesday, and Thursday from 2:30 - 4:30 and 6:30 - 9:00. This makes it more convenient to borrow books and other library materials. Residents from all areas of Swanzey are using the library as well as the students and teachers in the school district.

Total circulation consisted of 12,502 books, 655 magazines and 105 phono-records. If special information or a specific book is not available in our own collection of library materials, they can be had with the help of the State Library by means of the Bookmobile and direct loans from Concord. Material can also be borrowed on inter-library loans from other libraries, usually the Keene Public Library which under the State Library System is the Service Center for our area.

Two Library Technique courses offered by the State Library and UNH were completed by the librarian. They are "Introduction to the Public Library" and "Library Services for Children." The assistant librarian, Mrs. Wil-

liam O'Gorman, also completed "Introduction to the Public Library."

Many books, new and used, have been given to the library this past year — some as memorial gifts. Fifty-three records were received as a gift from the RCA Record Company and fifty from Columbia Record Company plus several from individuals.

Respectfully submitted,
RUTH PALM
Librarian

Report on Sewerage
Facilities for Heavily
Populated Areas
CDM 447-1

Gentlemen:

In compliance with the terms of our contract with the Town, dated May 16, 1968, we have made an engineering investigation and have developed a comprehensive plan for the collection of sanitary sewage wastes from the heavily populated areas in North and West Swanzey. This report is a continuation of the study made for the Ashuelot Valley Regional Planning Commission Report of February 1968.

The conclusions we have reached in our investigation of the sewerage problem and our recommendations relative to the most economical solutions for the sewering of these communities, together with an initial construction program, estimates of cost, and suggested methods of financing, are presented in the following report and are summarized below.

Conclusions

The conclusions which we have reached from our investigations for this report and for the report to the Ashuelot Valley Regional Planning Commission of February 1968 and upon which we have based our recommendations, are as follows:

1. The State of New Hampshire has recently classified the Ashuelot River and its tributaries in the vicinity of Swanzey as Class B waters. The new stream standards are such as to require a higher degree of treatment than screen-

ing, plain sedimentation and chlorination for sewage before it is discharged into the river.

2. The Homestead Woolen Mill in West Swanzey is discharging raw sewage and untreated industrial wastes to the Ashuelot River and must provide a treatment plant in the near future. There are problems with individual cesspools in North and West Swanzey.

3. The Federal Government provides additional funds for constructing sewage disposal facilities which involve more than one municipality, by raising its share from 50 per cent to 55 per cent of the total construction cost under these conditions. At the present time, the State of New Hampshire provides 40 per cent of the total cost of such facilities under either circumstances, with the result that either 90, or 95 per cent of the total cost may be obtained from State and Federal Grants. Thus the total cost to a town would be reduced by 50 percent if it entered a joint plan for sewage disposal, all things being equal. The use of these grants are limited to the construction of sewage treatment plants, pumping stations and interceptors.

4. Treatment facilities constructed by industries are only subsidized to the extent that the facilities may be deducted from earnings as a capital expense and the result may well be financially disastrous to the industries involved. However, if the facilities are constructed by a municipality, the facilities may be financed in accordance with the conditions set forth in the previous paragraph.

5. The most economical solution to the sewage disposal problems of the members of the Ashuelot Regional Planning Commission would include joint-operation of three sewerage treatment plants. The main plant would serve Keene, Marlboro and North Swanzey. West Swanzey and Troy would have individual plants because of the great distances from other population centers.

6. Swanzey will save $86,000.00 in estimated capital costs under the plan and assuming that it constructs the pumping facilities in North Swanzey and the treatment

facilities in West Swanzey, and will do no better under any other plan. North Swanzey would save $13,000.00 and West Swanzey $73,000.00. Operating costs will not be increased.

7. Operating and maintenance costs will be the same or less for all municipalities if all of the sewage disposal facilities, including pumping stations and interceptors, are administered by one organization. The removal of this burden from the shoulders of the local administration cannot be measured in monetary terms.

8. Local sewer systems should be constructed, operated and maintained by individual municipalities to provide local control over services and extensions. At the present time, limited Federal funds are available for this purpose.

Conclusions pertinent to individual communities are as follows:

A. **North Swanzey**

9. The boundaries of the area in North Swanzey which would logically be served by sewers correspond closely to the boundaries of the North Swanzey Water and Fire Precinct and we have used these limits for this study. Sewers recommended for this area are shown on Fig. 5.

10. The initial and ultimate sewered populations for the recommended North Swanzey sewer district are estimated to be 1,720 and 2,860 persons, respectively. The latter figure is about the same as the preliminary figure of 2,830 persons used in the 1968 Ashuelot Report.

11. North Swanzey is a residential community with some commercial establishments, so that the sewage will have the composition and strength of domestic wastes. The estimated average design sewage flow from the sewer district at full development is about 0.53 mgd. This flow is slightly more than the 0.48 mgd used in the 1968 Ashuelot Report for the year 2010.

12. Some of the property owners in North Swanzey have expressed a desire of an extension of the Keene sewer

system to serve this community because of difficulties with individual waste disposal systems.

13. The houses on and adjacent to the shores of Wilson Pond in North Swanzey are closely spaced and there is an ever-present danger that the pond will become contaminated from cesspool overflows at some time in the future.

14. The portion of North Swanzey to the north and west of the pond is underlain by a medium sand overlying a gravel stratum which has provided adequate drainage from cesspools to the present time. However, the portion to the east of the pond and on the side of Mount Huggins is partially underlain with glacial till which has reportedly caused a few drainage problems.

15. The estimated cost of construction of sewers to serve North Swanzey is $1,274,200.00 to which sum should be added $24,000.00 for the collection, treatment and disposal of sewage, as set forth in the 1968 Ashuelot Report. This amounts to $27.30 per foot of sewer. Initial construction would cost $1,129,600.00. The cost of house connections and the conversion of house plumbing is not included in the above.

16. The system of sewers would be tributary to jointly-operated stations which discharge to a sewer in Park Street and Sylvan Way. This would cost $224,400.00 less than a deep gravity sewer leading to a jointly-operated pumping station at the outlet to Wilson Pond.

B. **West Swanzey**

18. The area in West Swanzey which would be served by sewers would extend from just east of Grove Street on the east bank of the Ashuelot River to just west of the Route 10 bypass on the west bank. Sewers recommended for this area are shown on Fig. 6.

19. The initial and ultimate sewered populations for the recommended West Swanzey sewer district are estimated to be 830 and 1,320 persons, respectively. The latter

figure is slightly less than the 1,420 persons used as a preliminary figure in the 1968 Ashulot Report.

20. West Swanzey has one main industry with houses and stores concentrated in the vicinity of the mill. Sewage from other than the mill will have the composition and strength of domestic wastes. Mill wastes will be treated in a separate report. The estimated average sewage flow from the sewer district would be 0.19 mgd. This flow is slightly less than the 0.25 mgd used in the 1968 Ashuelot Report.

21. It is reported that a few property owners in West Swanzey are having problems with their sewage disposal systems, some of which may be overflowing to the Ashuelot River.

22. West Swanzey has sandy soils generally but boulders have been encountered down to bedrock in the vicinity of Winchester Street and glacial till exists on the higher ground to the east.

23. The estimated cost for constructing sewers to serve West Swanzey is $982,900.00 to which sum should be added $62,000.00 for constructing sewage disposal facilities. This amounts to $31.20 per foot of sewer. Initial construction would cost $89,000.00. The cost of house connections and conversion of plumbing is not included in the above.

C. **Remaining Portions of Town**

24. The communities of East Swanzey, Swanzey Center and Westport are too small and remote to be considered for sewerage systems.

Recommendations

We recommend that the town provide sewerage for the communities of North and West Swanzey and consider joining a regional sewage disposal authority, both in general accordance with Plan IV recommended in the 1968 Ashuelot Report. These decisions should be made in the near future so that capacity is reserved for North Swanzey at a regional waste facility and so that Homestead Woolen Mills can de-

termine what its waste disposal costs will be. Our detailed recommendations are listed below in the order which the work should be carried out:

1. Accept sewer districts in North and West Swanzey, approximately as shown on the plans, Fig. 5 and 6. The North Swanzey sewer district should logically have the same boundaries and be under the control of the North Swanzey Water and Fire Precinct.

2. Join with the municipalities of Keene, Marlboro, and/or Troy in establishing a regional authority with power to issue bonds and to design, construct, enlarge, operate and maintain sewage disposal facilities. North Swanzey should reserve 0.48 mgd of capacity at the main sewage treatment plant.

3. Make application for and obtain, when available, Federal grants for the construction of the systems of sewers recommended in this report.

4. Raise remainder of funds required to construct the systems of sewers by having the districts issue 20-year, general obligation bonds.

5. Establish a schedule of charges together with the necessary property taxes within the individual districts in order to finance the project. The money thus obtained would be used to retire bonds, pay bond interest, operate the sewer systems and reimburse the regional authority for the districts' share of the cost of constructing and maintaining the jointly-operated sewage disposal facilities.

6. Construct systems of gravity sewers to serve the North Swanzey sewer district as shown on Fig. 5. The sewers would discharge to an interceptor, or to pumping stations which would be located at either end of Wilson Pond, the trunk sewer and both stations to be constructed and operated by the regional authority. Both pumping stations would discharge to the interceptor which leads to sewage disposal facilities.

7. Construct systems of gravity sewers to serve the

West Swanzey sewer district as shown on Fig. 6. The sewers would discharge to an interceptor leading to a sewage treatment plant and operated by a regional authority. The Homestead Woolen Mill would be included in the West Swanzey sewer district but could discharge directly to the interceptor.

8. Retain one-acre zoning for those residential areas which will not be provided with sewers,

We wish to express our appreciation to the Board of Selectmen, Mr. Jacob M. Hackler, Chairman, Mr. Halsey H. Smith and, particularly, Mr. David M. Perry who provided insight into many of the problems. We also wish to thank Mr. Carl O. Snow, Chairman of the North Swanzey Water and Fire Precinct, for his cooperation.

Very truly yours,

Camp, Dresser & McKee

Report of Forest Fire Warden & District Chief

People cause fires. Our records show that the number of fires increase in an area as the population increases and our state is growing tremendously. This means that we all must be aware of fire causes and do our best to prevent their occurrence.

When we are very young the lighted matches is an adventure, burnt fingers and a dropped match is another fire. A little older we like to have a woodland cookout, or go out by ourselves for a smoke but fire and forests get together for another statistic. We adults like to clean up in the spring, burn the old debris and the dead grass, result — escaped fires and much personal expense.

With new homes and summer cottages located in woodlands and with abandoned fields and forests crowding the back yard of our villages' streets, it is necessary that everyone be aware all through the fire season, which comes with the disappearance of the snow, of the need to be careful with outdoor fires and fire sources.

The following action will help:

1. To teach our children the danger of lighted matches.
2. To NEVER discard lighted smoking material from a car or while walking through fields or woods.
3. To safely dispose of rubbish preferably at the town dump. If you must burn—
   a. You need a written permit from the town fire warden for ALL debris burning except when the ground is covered with snow. Cooking fires in outdoor fireplaces or in charcoal brasiers in your own back yard is permitted on notification of the warden.
   b. The warden is forbidden by regulation to allow burning of household rubbish on GRASS by householders between 9:00 A.M. and 5:00 P.M.
   c. Have equipment on hand to control the fire BEFORE you light the match.
4. Promptly report any fire out of control to your fire wadren or fire department.

Help to keep our town out of the fire occurrence column and save your tax dollars for useful purposes.

Forest fire record for 1968:
